

libemc::SimulatorImplementation

```
graph BT; A[libemc::SimulatorImplementation] -- "theSimulatorImplementation" --- B[libemc::Simulator];
```

The diagram illustrates a static variable declaration and definition. At the top, a box contains the type name `libemc::SimulatorImplementation`. Below it, the text `theSimulatorImplementation` is centered. At the bottom, a black box contains the namespace and class name `libemc::Simulator`. A vertical purple line with an arrowhead at the top connects the bottom box to the text, indicating that the static variable `theSimulatorImplementation` is defined within the `libemc::Simulator` class.
