

**NAME**

`sjisconv` – convert a TeX document in SJIS encoding into ‘preprocessed’ form.

**SYNOPSIS**

`sjisconv <infile> outfile`

**DESCRIPTION**

SJIS encoding for Japanese uses the characters `{`, `}`, and `\` which have special meanings in TeX documents.

After processing a L<sup>A</sup>T<sub>E</sub>X 2<sub>ε</sub> document which contains SJIS characters with **`sjisconv`** you need not care about these special characters.

This filter is part of the **CJK** macro package for L<sup>A</sup>T<sub>E</sub>X 2<sub>ε</sub>.

**SEE ALSO**

**`bg5conv(1)`**, **`cefconv(1)`**, **`cef5conv(1)`**, **`cefsconv(1)`**, **`extconv(1)`**,  
the **CJK** documentation files.
