1 Book cover parts and sizes

In the following picture we can see a typical dust jacket. Its main parts are back flap, back, spine, front and front flap. Typographically, a book cover is a dust jacket without flaps, the only difference is that the book cover is a fixed part of the book, whereas the dust jacket is removable.

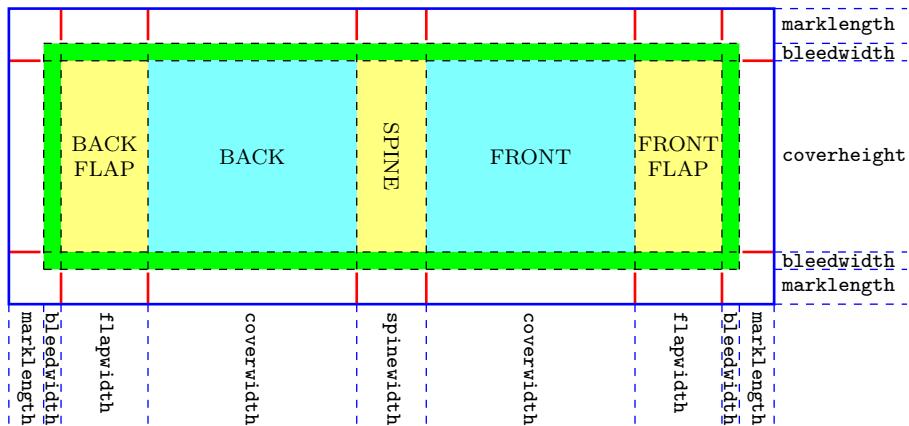

When we prepare a cover for printing, some marks are needed to know where to trim or fold the paper. These marks determine a special area of the sheet, which is called “bleed” (see the next figure). The background will be expanded onto the bleed, taking account of slight inaccuracy when trimming.

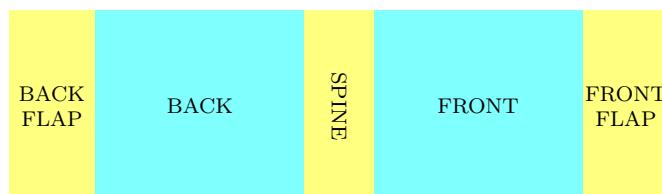

1.1 Sizes

We have to give the following sizes to prepare a cover: `coverwidth`, `coverheight`, `spinewidth`, `flapwidth`, `marklength`, `bleedwidth`.

1.2 Trimmed version

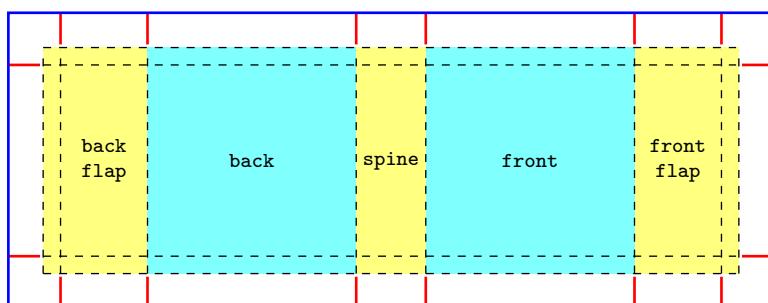

After trimming we get the following result:

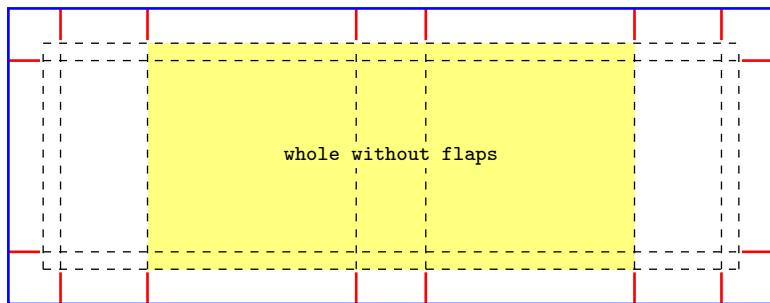

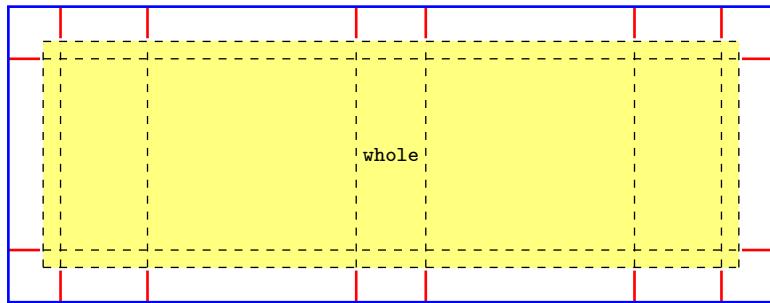

1.3 Background parts

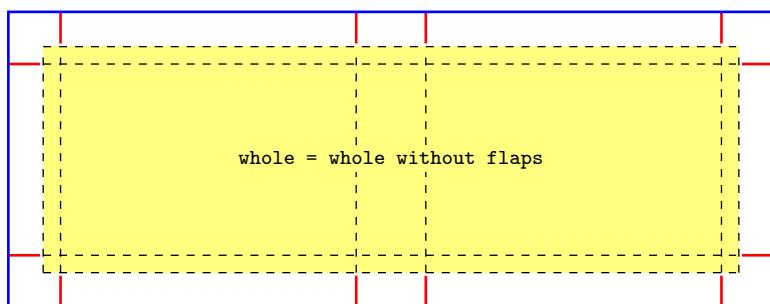

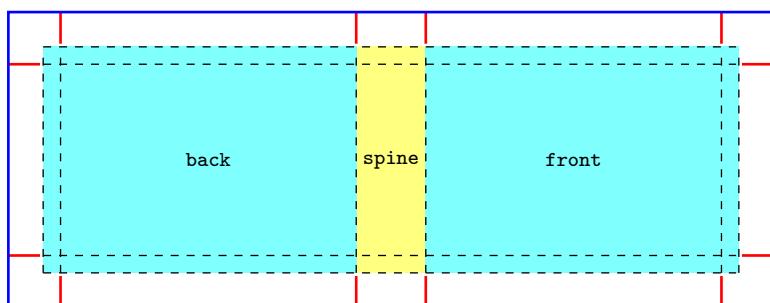

Important: The bleed is a part of the background!

In case `flapwidth>0mm`

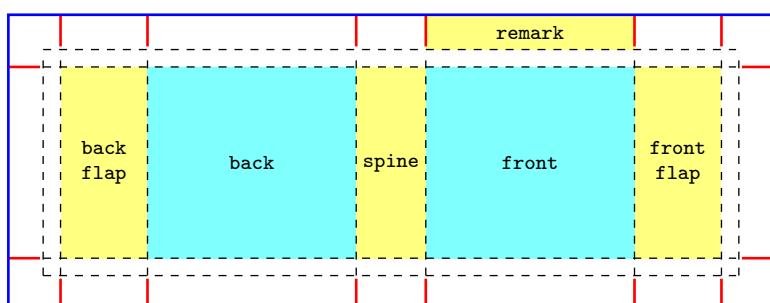

In case $\text{flapwidth}=0\text{mm}$

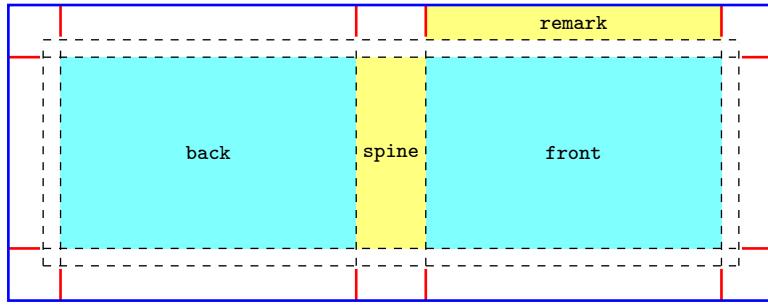

1.4 Foreground parts

Important: The bleed is not part of the foreground!

In case $\text{flapwidth}>0\text{mm}$

In case `flapwidth=0mm`

2 Description

2.1 Loading class

The class `bookcover` requires the services of the class `article` and the following packages: `kvoptions`, `geometry`, `graphicx`, `calc`, `xcolor`, `ifthen`, `tikz`, `eso-pic`, `textpos`.

Load the class as usual, with

```
\documentclass[<options>]{bookcover}
```

book cover size options (see Subsection 1.1)	default values
<code>coverwidth=<length></code>	170mm
<code>coverheight=<length></code>	240mm
<code>spinewidth=<length></code>	5mm
<code>flapwidth=<length></code>	0mm
<code>marklength=<length></code>	10mm
<code>bleedwidth=<length></code>	5mm

other options	
<code>markthick=<length></code>	thick of marks (default value: 0.4pt)
<code>markcolor=<color></code>	color of marks (default value: red)
10pt	normal font size is 10 pt (default)
11pt	normal font size is 11 pt
12pt	normal font size is 12 pt
<code>grid</code>	grid for checking sizes
<code>trimmed</code>	show trimmed version (see Subsection 1.2)

Example:

```
\documentclass[flapwidth=50mm,spinewidth=15mm]{bookcover}
```

2.2 Commands

This class defines two commands:

```
\setbookcover{<main layer>}{<part>}{<content>}
```

`<main layer>` (see the following subsubsections)

`bgcolor`, `bgpic`, `bgtikz`, `fgfirst`, `fgsecond`

The `<part>` and the `<content>` depend on the `<main layer>` (see the following subsubsections).

```
\makebookcover
```

2.2.1 Background colors

```
\setbookcover{bgcolor}{<background part>}{<colors>}  
<background part> (see Subsection 1.3)  
    back, front, spine, front flap, back flap, whole without flaps, whole  
<colors> (options of command \fill of package tikz)  
    color=<color name> (See <color name> in the package xcolor.)  
    top color=<color name>  
    bottom color=<color name>  
    middle color=<color name>  
    inner color=<color name>  
    outer color=<color name>  
    ball color=<color name>  
    shading angle=<degrees> (This rotates the shading by the given angle.)
```

Example:

```
\setbookcover{bgcolor}{whole without flaps}{  
    top color=white, bottom color=blue!50!black, shading angle=60}
```

2.2.2 Background pictures

```
\setbookcover{bgpic}{<background part>}{<picture file>}  
<background part> (see Subsection 1.3)  
    back, front, spine, front flap, back flap, whole without flaps, whole
```

The picture will be rescaled according to the sizes of the current background part.

Example:

```
\setbookcover{bgpic}{front flap}{fig.png}
```

2.2.3 Background TikZ figures

```
\setbookcover{bgtikz}{<background part>}{<tikz code>}  
<background part> (see Subsection 1.3)  
    back, front, spine, front flap, back flap, whole without flaps, whole
```

The TikZ figure will be placed to the upper left corner of the current background part, without resizing.

Example:

```
\setbookcover{bgtikz}{back}{  
    \fill[color=blue](0mm,250mm)--(100mm,250mm)--(100mm,245mm)--(0mm,110mm)--cycle;  
    \fill[color=yellow](5mm,5mm)--(175mm,245mm)--(175mm,0mm)--(5mm,0mm)--cycle;}
```

2.2.4 First foreground

```
\setbookcover{fgfirst}{<foreground part>}{<content>}
```

<foreground part> (see Subsection 1.4)
 back, front, spine, front flap, back flap, remark

The first foreground is the top layer of the book cover (see Subsection 2.3).

Example:

```
\setbookcover{fgfirst}{spine}{  
    \vfill  
    \begin{center}  
        \rotatebox[origin=c]{90}{\bfseries Annales Mathematicae et Informaticae}  
    \end{center}  
    \vfill}
```

2.2.5 Second foreground

```
\setbookcover{fgsecond}{<foreground part>}{<content>}
```

<foreground part> (see Subsection 1.4)

back, front, spine, front flap, back flap

The second foreground is under the first foreground (see Subsection 2.3).

Example: The following code puts a picture behind the ‘TEXT’ on the front cover:

```
\setbookcover{fgsecond}{front}{

\begin{center}
    \includegraphics[width=80mm]{pic.png}
\end{center}

\setbookcover{fgfirst}{front}{

\begin{center}
    TEXT
\end{center}

\end{center}}
```

2.2.6 Making book cover

```
\makebookcover
```

This command makes the book cover by using contents of background and foreground.

2.3 Layers

In the following table we can see the hierarchy of the layers:

<code>fgfirst</code>	back, front, spine, front flap, back flap, remark	<i>top layer</i>
<code>fgsecond</code>	back, front, spine, front flap, back flap	↑
	back, front, spine, front flap, back flap	↑
<code>bgtikz</code>	whole without flaps	↑
	whole	↑
	back, front, spine, front flap, back flap	↑
<code>bgpic</code>	whole without flaps	↑
	whole	↑
	back, front, spine, front flap, back flap	↑
<code>bgcolor</code>	whole without flaps	↑
	whole	↑
		<i>bottom layer</i>

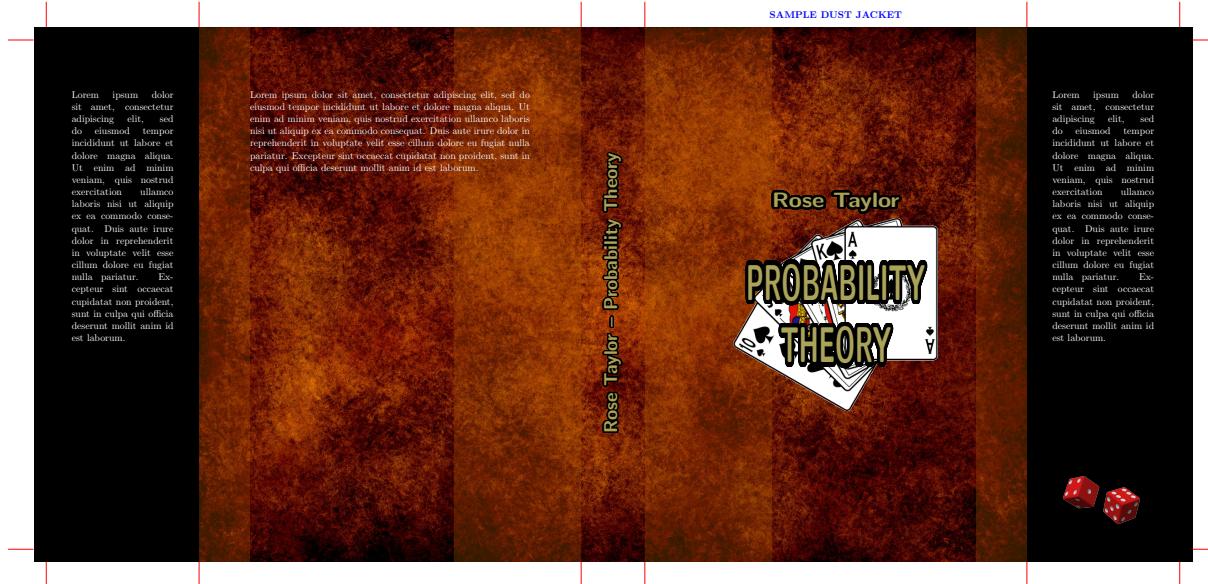

For example, in case

```
\setbookcover{bgpic}{whole}{fig1.jpg}
\setbookcover{bgpic}{front}{fig2.jpg}
\setbookcover{fgsecond}{front}{fig3.jpg}
\setbookcover{fgfirst}{front}{TEXT}
```

the TEXT is above the fig3.jpg, the fig3.jpg is above the fig2.jpg and the fig2.jpg is above the fig1.jpg.

3 Examples

The first example is a dust jacket.

```

\documentclass[11pt,spinewidth=25mm,coverwidth=150mm,coverheight=200mm,flapwidth=60mm]{bookcover}
\usepackage{contour}
\contourlength{1pt}
\definecolor{lightbrown}{RGB}{176,88,0}
\colorlet{title}{yellow!60!black}
\begin{document}

% Black background color on the whole cover
\setbookcover{bgcolor}{whole}{color=black}

% Brown background picture on the whole cover, without the flaps
\setbookcover{bgpic}{whole without flaps}{./figures/bg.jpg}

% Vertical light brown transparent trails on the back cover by a tikz code
\setbookcover{bgtikz}{back}{
    \fill[opacity=0.3,color=lightbrown]
    (0mm,0mm) rectangle (20mm,210mm)
    (100mm,0mm) rectangle (150mm,210mm);}

% Vertical light brown transparent trails on the front cover by a tikz code
\setbookcover{bgtikz}{front}{
    \fill[opacity=0.3,color=lightbrown]
    (0mm,0mm) rectangle (50mm,210mm)
    (130mm,0mm) rectangle (150mm,210mm);}

% Remark
\setbookcover{fgfirst}{remark}{
    \bfseries\color{blue}SAMPLE DUST JACKET}

% Text on the front cover
\setbookcover{fgfirst}{front}{
    \centering
    \vspace{60mm}
    \color{title}\sffamily\bfseries
    \resizebox*{50mm}{8mm}{\contour[120]{black}{Rose Taylor}}
    \par
    \vspace{20mm}
    \resizebox*{90mm}{40mm}{\parbox{35mm}{

```

```

\centering
\contour[120]{black}{PROBABILITY} \\
\contour[120]{black}{THEORY}\\}

% Picture (cards.png) on the front, behind the title
\setbookcover{fgsecond}{front}{%
  \vspace{70mm}
  \centering
  \includegraphics[width=8cm]{./figures/cards.png} }

% Text on the spine
\setbookcover{fgfirst}{spine}{%
  \vfill
  \centering
  \rotatebox[origin=c]{90}{\contour[120]{black}{%
    \color{title}\huge\sffamily\bfseries
    Rose Taylor -- Probability Theory}}
  \vfill}

% Text on the back cover
\setbookcover{fgfirst}{back}{%
  \centering
  \vspace{20mm}
  \parbox{110mm}{\color{white}

    sunt in culpa qui officia deserunt mollit anim id est laborum.}}

% Making the dust jacket
\makebookcover

\end{document}

```

The second example is a two-sided book cover. The outside and the inside are edited in the same document.

ANNALES MATHEMATICAE ET INFORMATICAE
International journal for mathematics and computer science

Referred by
Zentralblatt für Mathematik
and
Mathematical Reviews

The journal of the Institute of Mathematics and Informatics of Eszterházy Károly College is open for scientific publications in mathematics and computer science, where the field of number theory, group theory, constructive and computer aided geometry as well as theoretical and practical aspects of programming languages receive particular emphasis. Methodological papers are also welcome. Papers submitted to the journal should be written in English. Only new and unpublished material can be accepted.

Authors are kindly asked to write the final form of their manuscript in L^AT_EX. If you have any problems or questions, please write an e-mail to the managing editor Miklós Hoffmann: hoffi@ektf.hu

The volumes are available at <http://ami.ektf.hu>
